PROFILE

Alessandro is a dedicated and highly motivated Software Engineer. I have more than seven years of experience in software development and the last years I had a great work using Ruby on Rails, hiring and leading a high-performance engineering team. I've been leading cross-functional squads and I love solving problems, think in the customers and to be involved in the startup culture.

Ruby / Ruby on Rails

JavaScript / Vue.js

HTML5 / CSS3 / SASS

SQL & NoSQL Databases

TDD/ Agile / SCRUM

AWS / Heroku / CI

GIT / Github

EDUCATION

Centro Universitário Católica de SC - BSc. Information Systems

2012 - 2015

Coursework: Algorithms, Discrete Mathematics, Data Structure, Programming, Database, Software Engineering, Project Management.

EXPERIENCE

Wedy, remote - Lead Software Engineer
October 2014 - Present

As a first engineer at Wedy, a fast-paced Wedding startup, I'm a key-player on business development and growth, creating the engineering culture and agile workflow, hiring the first engineers and designers, and releasing AI-related products - award as one of the #6 great AI product in the world. Also, I've been leading cross-functional squads and doing customer development. Technically, I've worked with Ruby on Rails and Vue.js, building GraphQL APIs, analyzing business data (Python), enabling third-party integrations, leading the development of the critical pieces of code and doing DevOps on Amazon AWS.

Master Sistemas, Jaraguá do Sul, Brazil - Analyst and Software Developer
May 2011 - September 2014

It's my first experience, were three years of experience developing and keep the ERP Textile, integrating with third-party APIs, like the Brazil government API. Releasing new products and leading the innovation area of the company. Responsible for such as agile development and best practices in software development.
