PROFILE

Alessandro is a dedicated and highly motivated Software Engineer. I have more than eight years of experience in software development, and in the last years, I had great work using Ruby on Rails, hiring and leading a high-performance engineering team. I've been leading cross-functional squads, and I love solving problems, think about the customers, and to be involved in the startup culture.

Ruby / Ruby on Rails

JavaScript / Vue.js / Stimulus.js

HTML5 / CSS3 / SASS

SQL & NoSQL Databases

TDD/ Agile / SCRUM

AWS / Heroku / CI

GIT / Github

EDUCATION

Centro Universitário Católica de SC - BSc. Information Systems

2012 - 2015

Coursework: Algorithms, Discrete Mathematics, Data Structures, Programming, Database, Software Engineering, Project Management.

EXPERIENCE

GitHub, remote - Software Engineer

February 2021 - Present

github.com

Working at Communities Team with Rails 7 and writing a lot of tests using Minitest. Challenging me day after day.

Dime, remote - Ruby on Rails Developer

May 2019 - February 2021

simplifiedime.com

Dime is a US-based company, and I have been doing a great job there, developing new features using Ruby on Rails 6, integrating third-party APIs. We have a strong culture of tests, and we use MiniTest and Capybara for this. We have been using Stimulus.js and vanilla JavaScript on the front-end.

Wedy, remote - Lead Software Engineer

October 2014 - September 2018

wedy.com

As a first engineer at Wedy, a fast-paced Wedding startup, I'm a key player in business development and growth, creating the engineering culture and agile workflow, hiring the first engineers and designers, and releasing AI-related products - award as one of the #6 great AI product in the world. Also, I've been leading cross-functional squads and doing customer development. Technically, I've worked with Ruby on Rails and Vue.js, building GraphQL APIs, analyzing business data (Python), enabling third-party integrations, and developing critical pieces of code, and doing DevOps on Amazon AWS.

Master Sistemas, Jaraguá do Sul, Brazil - Analyst and Software Developer
May 2011 - September 2014

It's my first experience, with three years of experience developing and keeping the ERP Textile, integrating with third-party APIs, like the Brazil government API. Releasing new products and leading the innovation area of the company. Responsible for such as agile development and best practices in software development.
